

Winter is Coming

2017 has been a year of extremes. We are just finishing up the hottest summer on record (or close to it for many locations) and whether or not you are ready to admit it, winter is coming. After our relentless 2016-17 winter with flooding, blizzards, historic snowpack, and crazy winds, people are understandably interested in what next winter will bring. Is it time to freak-out yet? Join Chris Smallcomb, Warning Coordination Meteorologist and Tim Bardsley, Senior Hydrologist from the National Weather Service in Reno, for an in-depth look at potential impacts and predictability.
