

Trout in the Classroom Teacher Training

Connect your students with their local watershed!

This hands-on program engages students in real-world biology and aquatic ecology.

Teachers and students work together to:

Raise trout from eggs to fingerlings, monitor tank water quality, engage in stream habitat study, appreciate water resources, foster conservation ethic, and understand ecosystem connectivity.

NEW TIC Teachers

Join us for this **FREE** workshop

Mandatory training required by Fish & Wildlife agencies for New Teacher participation in TIC program with SWEP, TERC or USFS support!

Topics covered include: how to care for trout eggs, tank set-up: equipment & procedures, biology and ecology of Lahontan Cutthroat Trout, and introduction to teaching resources.

Date: Tuesday, March 5th

Time: 4:00-7:00pm

Place: UC Davis Tahoe Science Center
291 Country Club Drive
Incline Village, Nevada 89451

****Returning TIC Teachers:** Sponsor organizations will be coordinating permitting applications via email. There is no in-person requirement, but you are welcome to attend the New Teacher Training as a refresher.

All participants (New & Returning) must register to participate in this year's Trout in the Classroom by March 1st using this link:
