

CHILDREN'S ENVIRONMENTAL SCIENCE DAY

AUGUST 20, 2016

Children's Environmental Science Day is a free community event for children ages 4 and up and their families. This year's carnival-style festival includes hands-on activities designed to create an awareness of the unique ecology of Lake Tahoe and provide an opportunity for young and old alike to learn about science and the environment.

The event is hosted by UC Davis scientists, staff, and local Lake Tahoe agencies and organizations.

Join us for science activities, games, crafts, and demonstrations. Come learn with your child!

DATE:
Saturday, August 20, 2016

TIME:
1:00—4:00 p.m.

LOCATION:
Commons Beach, East Lawn
Tahoe City, CA
