

When will they hatch?

_____ need _____ T.U. to hatch.

Hatchery Data:

Date eggs were fertilized: _____

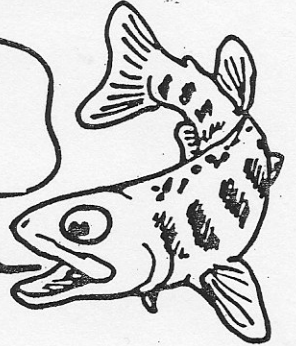

Date eggs arrived in your room: _____

TOTAL DAYS spent at hatchery

Average hatchery water temperature

$$\boxed{} \frac{\text{T.U.}}{\text{day}} \times \boxed{} \text{ days} = \boxed{} \text{ T.U.}$$

AVERAGE TEMPERATURE
MINUS 32 DEGREES
=

In The Classroom:

Total T.U. required for hatching: _____

at hatchery: _____

's still needed: _____

→ Average daily temperature has been:

This means that D.T.U. will accumulate each day.

Our fish will hatch in days!

The date will be: !
