

Dark Side of the Universe

What is dark matter? This elusive “stuff” makes up a quarter of the universe. Join Dr. Maruša Bradac to hear about research on the composition of the Universe, properties of dark matter, and the latest discoveries about the Universe’s past. Dr. Maruša Bradac, originally from Slovenia, is a physics professor at UC Davis. The tools of her trade are telescopes in space, including the Hubble Space Telescope and Spitzer Space Telescope, the future James Webb Space Telescope, and also on the ground, the Keck Telescope in Hawaii.

WINTER LECTURE SERIES

Feb.
8

5:30 – 7 p.m.

UC Davis Tahoe Science Center
291 Country Club Dr.,
Incline Village, Nevada
